

# CVC Coordinators Communiqué

**No. 2009 - 02**  
**September 30, 2009**

Dear Volunteer Coordinators,

The new CVC Video is now available for viewing at any PC. It will not be distributed as a DVD this year.

Double-click on the link below and it should take you right to the video and start playing. If your screen does not change to the video, try minimizing the open pages on your desktop until you can see the video. It is a Windows Media File and is stored on the Knowledge Center (KC).

<https://covkc.agencies.virginia.gov/cvc/CVCL09.wmv>

This link will take you there. Your agency does not need to be a KC user for this link to work.

Please check it out before sending it to your coworkers or before using it in a kickoff event. It does not run from a DVD player but requires a PC with a monitor or it can be run from a laptop if external speakers are attached (desktop speakers are usually sufficient). The PC can be hooked to a projector and displayed on a wall or a portable screen.

Please give it a shot and let me know how it runs at your agency. I'd like some feedback before we put the link on the CVC homepage.

So make some popcorn, grab some tissues, and watch the video (8 minutes).

Thanks to all of you!
